Aether DBS Delivers Steam Skids to OTSGs in Alberta Oil Sands

Aether DBS has fabricated, assembled, and delivered the first 17 of 30 process skids to be used in the Alberta, Canada Oils Sands for Steam-Assisted Gravity Drainage (SAGD). These skids will be integral to 10 Once-Through Steam Generators (OTSGs) for the outlet and blow-down of steam, and for the make-up of boiler feed water. Aether DBS manufactured the skids on a turnkey basis, providing all structural, piping, testing, electrical, and insulation work.

We are an ASME U, UM, S, and R Stamp Code shop, with CWB and CRN approvals. We're also a UL and UL Canadian electrical panel shop, capable of providing industrial panels for Class 1, Div 1 or 2 Hazardous Areas. We can provide production of all your oil sands process skid needs.

Take advantage of our expertise, competitive pricing, and year-round fabrication capabilities to keep your next Oil Sands project on track, on schedule, and on budget.

For more information about our capabilities, or to inquire about your next project quote, please contact us at info@aetherdbs.com or 1-877-637-9470. You can also visit our website aetherdbs.com.
